PAP SMEARS

Your screening Pap smear could require a pathologist's review. If a review is required, a cytology fee is automatically incurred and charged to the patient. This fee of $60 will not be covered under Wellness coverage, **but will** fall under non-routine medical benefits, and could be subject to deductible, co-pays, and coinsurance.

HUMAN PAPILLOMA VIRUS TESTING (HPV)

Human Papilloma Virus (HPV) is a common virus that affects both females and males. Most types are harmless, do not cause any symptoms, and resolve without treatment. Some are high risk and can cause cervical cancer or abnormal cells in the lining of the cervix that can sometimes turn into cancer.

If your pap smear shows atypical cells of undetermined significance (ASCUS), an HPV test for the High Risk subtypes may be ordered. If the results are negative, we will repeat your pap smear in one year. If the results are positive, we will call you into the office for additional testing.

HPV testing as a result of an abnormal pap smear will allow us to expedite testing and get results to you in a timely manner. There is an additional charge for HPV testing that is not covered under Wellness coverage, **but** will fall under non-routine medical benefits, and could be subject to deductible, co-pays, and coinsurance. The charge is approximately $100 for HPV testing and will be billed to your insurance.

By signing below, you acknowledge receipt of the information regarding possible cytology fees and HPV test fees and you acknowledge that you and/or your insurance may be charged if medically necessary.
